## EDUCATION

**Bachelor of Science Honours Computer Science | Expected Graduation, May 2028**

*York University, Toronto, Ontario*

**Relevant Coursework:** Object-Oriented Programming in Java, Linear Algebra, Discrete Mathematics ,  
Data structures and algorithms , Computer architecture , Web development (JavaScript)

---

## EXPERIENCE / PROJECTS

### Customer Service Associate

Metro, Toronto, ON

July 2023 – February 2025

- Collaborated with team members in a fast-paced environment, demonstrating teamwork.
  - Gathered and communicated customer feedback to management
  - Delivered excellent customer support by efficiently resolving inquiries and managing transactions
- 

### Delatio | NVIDIA Spark Hack Toronto

May, 2026 – Toronto · ontario

- Co-developed a local-first, edge-compute urban risk intelligence platform running dual proactive and reactive AI loops entirely on a single NVIDIA Grace Blackwell GB10 node.
- Engineered the GIS data layer by optimizing raw Toronto Open Data datasets into a high-performance, in-memory GeoPandas structure.
- Implemented ultra-low-latency spatial queries that process complex infrastructure, structural data, and historical records to feed an autonomous agent in under 20 ms.
- Built the system with zero cloud API dependencies to ensure complete data privacy and continuous operational reliability for civic emergency response in the field.

### Potluckio

Feb, 2026 – Toronto, Ontario

- Built a real-time group meal planning web app at CTRL+HACK+DEL Hackathon, implementing live item claiming with Firebase Firestore so guests can coordinate contributions instantly via a shared link.
- Served as Lead UI/UX Developer & Git Specialist on a 2-person team, owning the entire frontend design and managing version control under hackathon time pressure
- Delivered a fully functional, deployable product within the hackathon deadline, with a live demo available publicly.

### Kolbeh

May, 2025 – Present Toronto, Ontario

- Designed and developed a fully responsive restaurant website for a live family business in Iran, actively used by real customers via QR code menu scanning.
  - Built a Node.js + Express backend with SQLite3 managing 30+ menu items with persistent storage, user authentication (bcrypt), and a favorites system
  - Designed protected REST API endpoints with secure architecture including password hashing and role-based access control.
  - Implemented smooth navigation, interactive UI elements, and dynamic menu pages optimized for desktop, tablet, and mobile
- 

### Skills:

- Languages: Java, JavaScript, Python, C, SQL
- Frameworks/Tools: Node.js/Express, React, Git, Linux, MySQL, SQLite
- Concepts: UI/UX, REST APIs, Authentication

### Languages spoken:

- English : full proficiency
- Persian: fluent
